KMEANS CLUSTERING

by

Yaser Alkayale

Submitted in partial fulfillment of the requirements
for the degree of Master of Computer Science

at

Dalhousie University
Halifax, Nova Scotia
June 2013

Optionally, the thesis can be dedicated to someone, and the student can enter the dedication content here.

Table of Contents

Abstract

This is a test document.

Acknowledgements

Thanks to all the little people who make me look tall.

Chapter 1

Introduction

Get it done! Use reference material by Limpet [2] or Gooses, Mittelback, and Samarin [1].

To test if the margins are satisfactory, let us generate a lot of garbage text: This sentence goes on, and and here we should be around top of the page 2, and we go on, and on, and on, and on,

and on. This following line ⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯ should be exactly 5cm long. It can be used to check the typesetting process. And now we go on, and on,

and on, and on.

Chapter 2

Doing It

2.1 Getting Ready

Get all the parts that I need. I can throw in a whole pile of terms like preparation, methodology, forethought, and analysis as examples for me to use in the future.

2.2 Next Step

Do it!

Of course, you have to have pictures to show how you did it to make people understand things better.

Chapter 3

Conclusion

Did it!
